

Jira template of the 20 User Stories of generation 14

<b>User Story 1: Search Availability by Exploitation Rights</b>	
<b>COMPONENTS</b>	Smart Content, Smart Rights, Smart UX
<b>TICKET SCOPE</b>	
Implement a search functionality that allows users to search for content availability based on exploitation rights, including the ability to specify periods and rights dimensions.	
<b>ASSUMPTIONS</b>	
<ul style="list-style-type: none"><li>• The user has the necessary permissions to perform availability searches.</li><li>• The rights matrix for exploitation rights is predefined and accessible.</li></ul>	
<b>CROSS IMPACTS</b>	
<ul style="list-style-type: none"><li>• Integration with the rights matrix and catalog data.</li><li>• Interaction with the search API and user interface.</li></ul>	
<b>BUSINESS NEED</b>	
To enable users to efficiently find available content for exploitation, ensuring they can maximize revenue opportunities by identifying available rights.	
<b>USER STORY</b>	
<b>As a</b> content manager, <b>I want to</b> search for content availability based on exploitation rights, <b>so that</b> I can identify and utilize available content for distribution.	
<b>ACCEPTANCE CRITERIA</b>	
AC 1 - Search by Exploitation Rights <ul style="list-style-type: none"><li>- <b>Given</b> a user with appropriate permissions,</li><li>- <b>When</b> the user specifies exploitation rights and search criteria,</li><li>- <b>Then</b> the system should return a list of available content matching the criteria.</li></ul>
